

Ink Jet Printable Materials Chart

Brady's new B-115 vinyl cloth offers the improved resolution of ink jet printing for your wire marking needs.

Type	Max. Service Temp. °F (°C)	Color	Finish	Use	Special Properties
PAPER					
B-113	158 (70)	White	Matte	Bar code and general labeling	High resolution for non-harsh applications
POLYESTER					
B-107	300 (149)	White	Matte	High-performance permanent labeling	Excellent solvent and abrasion resistance
B-136	300 (149)	Silver	Matte	Rating Plates	Metallized polyester
B-966	250 (121)	Clear	Gloss	Overlamine for PermaShield™ labels	Transparent/durable
POLYOLEFIN FILM					
B-114	200 (93)	White	Matte	High-performance permanent labeling	Permanence plus abrasion and solvent resistance
TEDLAR®					
B-137	194 (90)	White	Matte	Permanent identification for circuit boards and ICs.	Self-extinguishing
VINYL					
B-117	158 (70) *30 days	White	Matte	Self laminating wire and cable marking	Excellent abrasion and smudge resistance
VINYL CLOTH					
B-115	180 (82)	White	Matte	Primarily for wire and component marking	Repositionable/flexible
